Ultra-low profile, very slim linear shower drain made entirely of V4A stainless steel

- √ Custom-fabricated for the exact desired length 500 mm—6,000 mm, outlet number and location, wall or horizontal flanches.
- √ Custom-fabricated horizontal outlet with siphon adjusted in any direction
- √ Tough and durable construction
- √ Simple to install. Only one body made from quality material that is designed to last.
- √ Quick and safe sealing
- √ Wall-to-wall installation, three-sided: entire floor is evenly sloped in one direction
- √ Any size tile can be installed on the floor, also giant XXL tiles
- √ Easy-to-clean showers with few seam lines
- √ Easy removal of shower drain cover without a special tool
- √ Easy cleaning of linear shower drain just by rinsing with adjustable shower head
- √ No need of a hair catcher. Hair and dirt are not trapped in the shower drain.
- √ Compatible with all types of underfloor heating
- √ Entirely made of high-quality V4A corrosion resistant stainless steel. Resistant to chloride containing water or salt water
- √ Extra long, low maintenance, very durable linear shower drain for busy public showers and demanding commercial washrooms
- √ With optional sand trap: Duschrinne Pro S
- √ Sand and dirt in sand trap can be easily removed with a portable wet cleaner. No expensive cleaning of blocked pipes

A wealth of variants — choose the best one for your shower design!

Low installation height: 20 mm, 40 mm, Duschrinne Pro S: 50 mm

- √ Precision custom-fabricated
- √ Made entirely of V4A stainless steel, 2 mm material thickness
- √ Custom-fabricated cover, 1.5 mm material thickness, brushed V4A stainless steel
- √ Weld-on horizontal outlet with siphon trap made of V4A stainless steel
- √ Vertical outlet for installation of pvc siphon
- √ Free location of outlet or outlets
- √ Free choice of number of outlets
- √ Standard: 40 mm outlet. For industrial purposes: optional 50 mm outlet

Length: 356 cm

Outlet variants

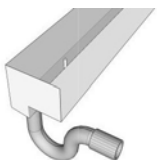

Horizontal outlet

- √ With siphon made entirely of V4A stainless steel
- √ Arbitrary direction in 15°-steps in 360° rotation
- √ 50 mm water seal siphon
- √ Siphon for installation above or within floor
- √ **40 mm installation height**

Horizontal outlet, center outlet location

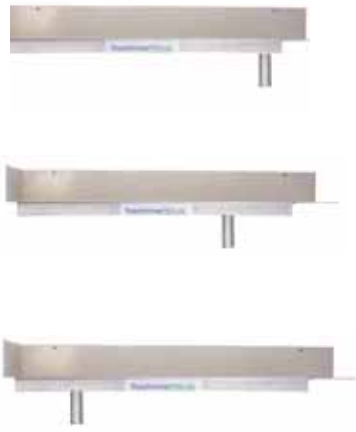

Horizontal outlet, end outlet location

Vertical outlet

- √ Outlet for installation of pvc siphon underneath the floor
- √ Free location of outlet or outlets: center outlet location, end outlet location, or any other location, custom-fabricated
- √ **20 mm or 40 mm installation height**

Length: 95 cm

Ultra-flat Duschrinne Pro:

20 mm installation height, vertical outlet

- √ Very low installation height, ideal for installation of level access showers in old buildings
- √ Maximum Length: 3,000 mm
- √ Flattest linear shower drain available
- √ Linear shower drain custom-fabricated to meet your needs
- √ The ideal solution for any renovation project

Wall flanges, horizontal flanges

Custom-fabricated 10 cm wall flanges for wall mounting and horizontal flanges for safe and easy sealing, easy pouring of floor screed with slope in one direction, easy installation of large format tiles on the floor

10 cm wall flange

Rear and left or right, custom-fabricated

2 cm wall flange for frameless glass shower screen

Left or right, custom-fabricated

Horizontal 10 cm flange

Rear, front, left or right, custom-fabricated

Brushed linear shower drain cover made of V4A stainless steel

- √ 40 mm width, available between 35 mm and 45 mm
- √ Duschrinne Pro S with sand sink over the entire length: 100 mm width
- √ 1.5 mm material strength
- √ Fabricated in one piece up to 2,500 mm

Easy-to-clean, no hair catcher needed

- √ No hair catcher needed. Hair and dirt cannot be trapped in the drain.
- √ Drain cover can be easily removed without a tool, and the linear shower drain is quickly rinsed with the handheld shower head.
- √ Low-maintenance, durable design for private and public showers

The slim linear shower drain cover can be tiled

- √ Can also be covered with thin floor covering
- √ Here, it is tiled with thin Kerlite XXL tiles.

Stepless height-adjustable linear shower drain cover

Stepless height-adjustable for thin floor coverings, 3 mm tiles up to 30 mm natural stone floor

Shower design without limitation

The barrier free dream shower shown to the left, tiled with grey Kerlite giant XXL tiles, was installed in an attic bathroom in an old house.

It is one of several modern, low maintenance bathrooms with floor-level showers, tiled with Kerlite giant XXL tiles made of very hard porcelaine stoneware by Cotto d'Este, that have been installed under the roof pitch during renovation projects carried out to create barrier free access in bathrooms in older buildings.

Custom-fabrication of the very-low profile linear shower drain Duschrinne Pro for this project enabled designing and installing the curbless shower exactly following the clients' ideas.

The result of a **partial bathroom remodel** in an older building is shown on the next page.

The large level-access shower cubicle offering high level of comfort and safety also for the elderly was installed wall-to-wall against the rear wall between the bath tub and the wall thanks to the custom-length extra-flat linear shower drain Duschrinne Pro. The custom-length, slim, unobtrusive linear shower drain Duschrinne Pro was installed here with approximately 140 cm length.

The renovation project creating the barrier free shower included installing thin Kerlite giant XXL tiles in the tub and shower area, resulting in a modern low-maintenance design with only few seam lines. The glass shower door and frameless glass shower screen add to the modern, easy-to-clean design.

The curbfree shower in another easy-to-clean bathroom that was created during a bathroom renovation in an older building is depicted on page 11.

Clever design of the bathroom in 5 square meters:

This is just a room that has average dimensions. At the same time it can put a large shower. Part of the space in the shower is used in two ways. Either in the shower or in the bathroom when the glass shower doors are folded back inside the shower.

The ultra-low profile linear shower drain Duschrinne Pro was mounted against the wall wall-to-glass shower door.

The custom-length super-flat linear shower drain enabled the exact implementation of the clients' shower planning. It is placed against the wall with approximately 120 cm length.

The floor-level shower shown on the following page was also installed in an old house, with the precision-fabricated ultra-flat linear shower drain Duschrinne Pro solving the problems of this renovation project.

It is another example of clever shower design with the very-low profile linear shower drain. A large shower was installed in a bathroom in spite of only little space available.

All generations enjoy the shower experience in the comfort of their new bathroom.

Have a look at our website to learn more about low-maintenance, modern shower designs that have been implemented with the extra-low profile linear shower drain Duschrinne Pro in new buildings and old houses.

All private shower installations presented in this brochure are from renovation projects in older buildings. You can find more contemporary, low-maintenance shower designs here:

Modern rain shower ideas & linear shower drain Duschrinne Pro with very high drainage capacity

Small bathroom corner rain showers, gorgeous walk in rain showers in tiny bathrooms, great shower tile ideas featuring large format tiles in attic bathrooms, modern level-access rain showers of any size - transform your bathroom into a wellness-oasis!

A walk in shower can create the illusion of more space and give the bathroom a clean-lined, modern look. By installing large format tiles, low-maintenance floor-level rain showers with few seam lines are created.

Most barrier free private showers shown in this brochure have a rain shower head installed. Oversized rain shower heads give an invigorating drenching. A linear shower drain with a high discharge capacity is needed.

The very-low profile linear shower drain Duschrinne Pro with its very high flow rate of about 1 l/s per outlet is the ideal linear shower drain for all rain shower heads.

Extra-flat linear shower drain Duschrinne Pro with built-in benches

Level entry shower designs on page 11, 13 und 19 have built-in benches in different styles.

The next pages contain more built-in bench ideas. Following the link on page18 will give you more beautiful shower bench ideas from basement to attic bathrooms.

The only time that being caught in a rain shower is a good thing is when it's... in your bathroom, with a head big enough to drench you in hot water.

Resting on a built-in bench after an invigorating shower and simply relaxing is the perfect way to enjoy the little spa you can create at home.

Very-low profile linear shower drain Duschrinne Pro placed against built-in shower bench with natural stone floor

This basement bathroom is equipped with a built-in shower bench spanning the whole width of the room. The rounded seat with the beautiful mosaic tiles is in perfect harmony with the natural stone tiles on the wall and floor, and the unobtrusive custom-length shower drain Duschrinne Pro mounted against the bench.

How to make your new bathroom easy to clean by design with the custom-length shower drain Duschrinne Pro

Clean-friendly bathroom design means the less corners, ridges, seams, hard to reach spots the better. Seamless integration of built-in shower bench with unobtrusive custom length shower drain Duschrinne Pro, frameless glass shower screen and tiled concealed cistern created a spacious level-entry shower and a modern, low-maintenance bathroom design.

Duschrinne Pro in large and small bathrooms

The stylish spacious shower to the left and the corner shower below are placed in the same house. Our clients chose the custom-length Duschrinne Pro in order to create two showers with a high level of comfort and safety.

Clever shower design created the modern shower in the small bathroom.

Duschrinne Pro in narrow bathrooms

Narrow bathrooms with modern level access rain shower

Easy-to-clean rain shower with high level of comfort and safety created in a bathroom renovation project with the very flat custom-length shower drain Duschrinne Pro wall mounted three-sided

Duschrinne Pro: 20 mm 40 mm installation height, custom-fabricated 500 mm - 6,000 mm

On the next page you will see a narrow bathroom in an old house.

The shower cubicle was placed against the wall in the middle of the room. The glass screen above the built-in shower bank makes the room feel larger.

What it lacks in square footage, this **minimalistic tiny bathroom** makes up for in high style.

The superflat, custom-length shower drain Duschrinne Pro is placed against the rear wall three-sided

The flattest custom-length shower drain available and the large rain shower head work hand in hand when providing and discharging the invigorating drenching our clients enjoy under the rain shower head in their tiny wellness-oasis at home.

Duschrinne Pro: 20 mm 40 mm installation height, custom-fabricated 500 mm - 6,000 mm

Duschrinne Pro for commercial washrooms

- √ Optimal planning of small and large public showers with heavy duty custom-length public shower drain Duschrinne Pro
- √ Linear shower drain made entirely of V4A corrosion-free stainless steel: very durable, low-maintenance, resistant to chloride containing water or salt water
- √ Easy sealing, tiling with large format tiles, cleaning of shower areas with few seam lines
- √ Wall-to-wall installation, three-sided: the entire floor is evenly sloped in one direction. High level of comfort and safety especially for individuals with a walking disability
- √ No hair catcher needed. Constantly very high flow rate of about 1 l/s per outlet
- √ Easy removal of cover without a tool
- √ Quick and hygienic cleaning
- √ Optimal for users and cleaning staff

Duschrinne Pro and Duschrinne Pro S for public showers

Modern, barrier free public showers in sport facilities and commercial facilities can be designed with high level of comfort and safety with the heavy-duty custom-length public shower drain Duschrinne Pro.

For internal and external showers with high input of sand: custom-length shower drain Duschrinne Pro S with integrated sand, dirt and mud sink. Perfect for all outdoor showers, private or public!

Easy removal of sand with a portable wet cleaner

Custom-length linear shower drain Duschrinne Pro for public shower in a fitness studio with two outlets for quick drainage of water from three shower heads
